About Me

I am an engineering undergraduate at Faculty of Engineering, University of Ruhuna, with a strong passion for coding and innovation. I have gained experience in developing scalable web applications and innovative software solutions through freelancing, active contributions to open-source projects and my own personal projects.

Experience

Freelancer

As a full stack developer on Upwork, I develop web applications and mobile apps for various overseas and local clients using latest and suitable stacks.

Active Open Source Contributor

I am an active OSS contributor. Contributing to open-source projects has enhanced my understanding of collaborative development practices and industry standards.

Projects

Kudos-Craft

This is my latest open-source SaaS web application, which provides a centralized platform for managing testimonials and offers the capability to embed them in various styles within users' applications. It's still under development.

Empower Academy

Empower Academy is a MERN stack platform making online education accessible and enjoyable. Key features include impressive UI, secure transactions, real-time mails, easy resource management and intuitive Admin Panel

WanderLust

I have actively contributed to WanderLust, a MERN stack-based travel blog website, where I mainly focused on implementing the platform's authentication system and addressing various UI bugs.

Let's Chat

A fully interactive chat app with real time chat capabilities and a user-friendly interface to enhance user experience

Education

Undergraduate(2023-2027)

Faculty of Engineering, University of Ruhuna, Sri Lanka

Student(2019-2022)
